Summary

Frontend-leaning fullstack engineer, 4 years, owns modules end to end in React and Node.js.

Experience

Fullstack Engineer, Rumah Digital (2020-present)

- Owned a design-system component library in React, used across multiple product squads.
- Built the Node.js API and test suite behind every feature I shipped, unprompted.
- Took ambiguous requirements to a working prototype and iterated with the design and tech leads.
- Comfortable presenting progress directly to stakeholders.

Skills

React, Node.js, design systems, automated testing, Figma handoff, communication.
